WEEKLY MORBIDITY REPORT
EXPLANATORY COMMENT

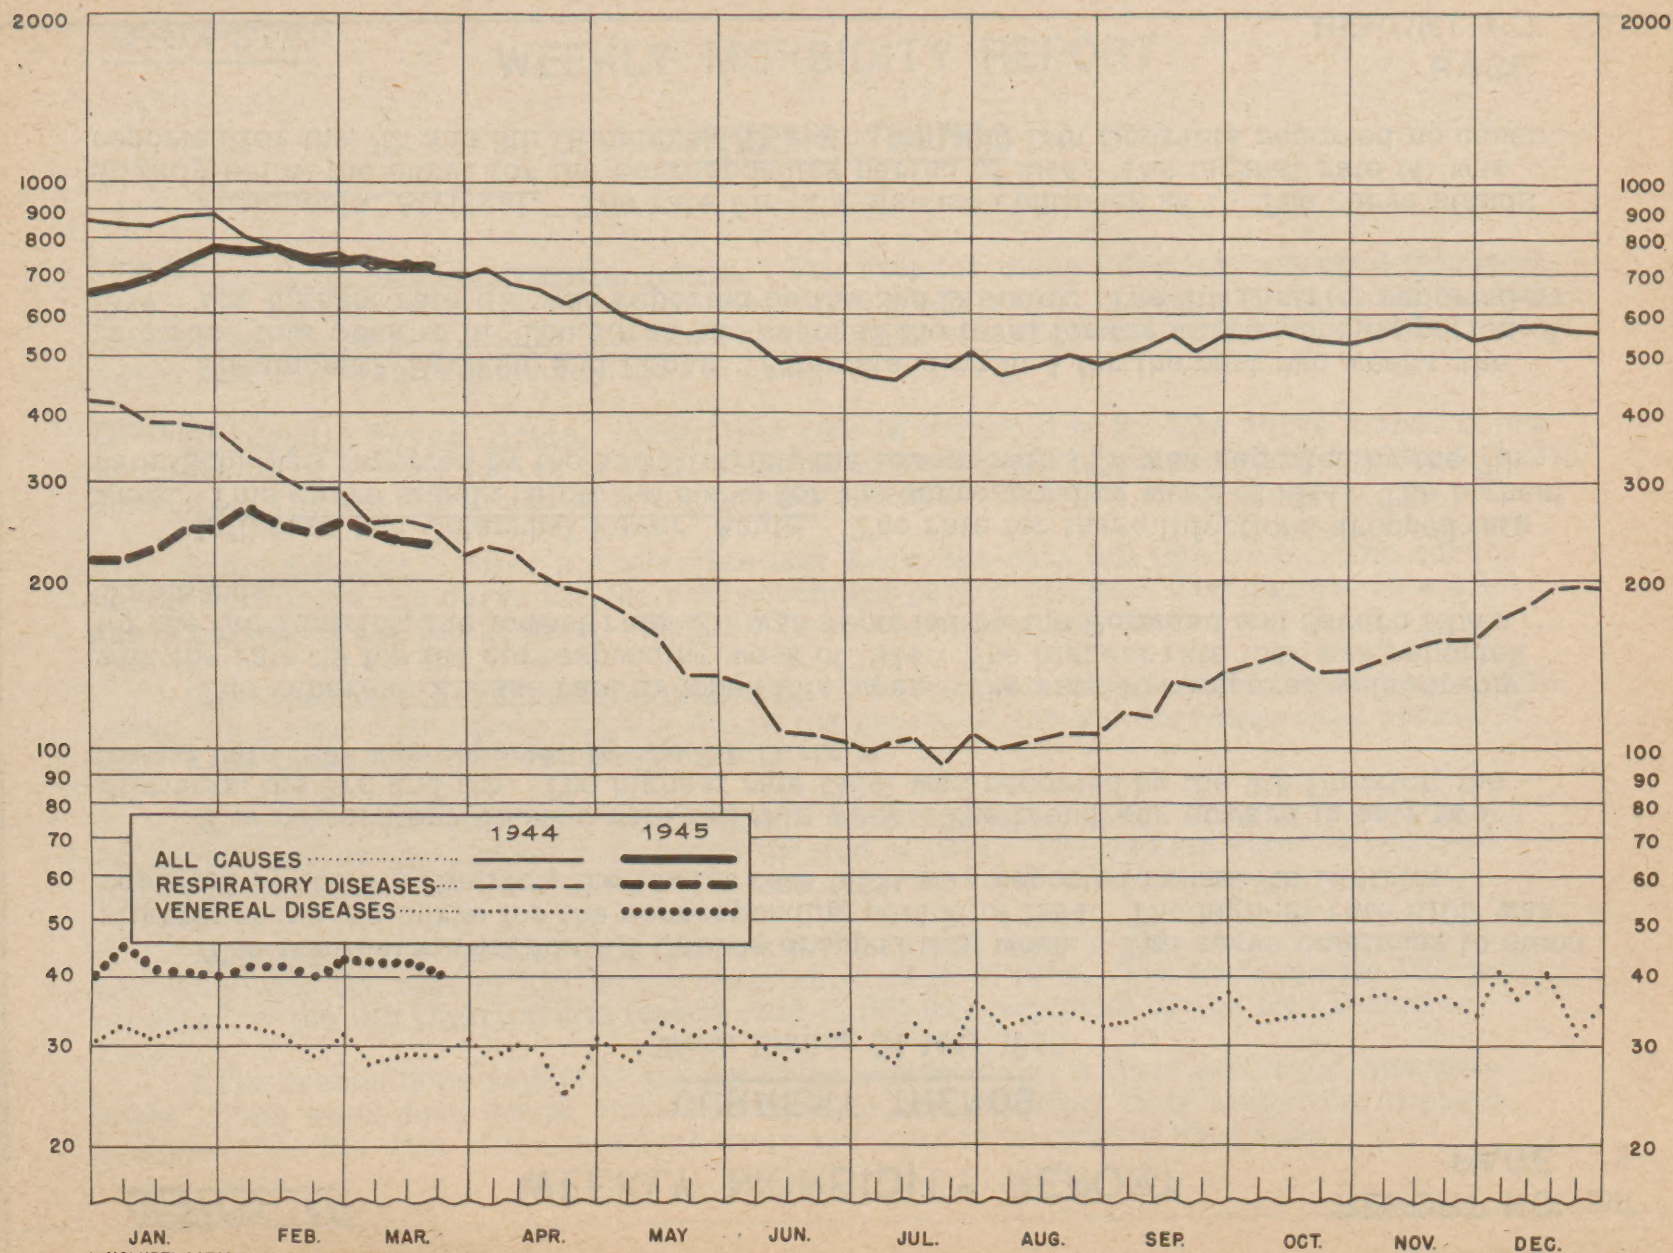

This report presents each week the annual admission rates per 1000 average strength for certain communicable diseases, venereal diseases, and all causes combined (diseases, injuries and poisonings). Source material is the weekly communicable disease reports submitted to BuMed by all shore stations within the continental limits of the United States.

Admission rates are calculated on an annual basis to facilitate comparison with corresponding annual, quarterly or monthly figures. Such annual rates of admission indicate the number of admissions per 1000 average strength which would occur over a year's time if the current week's experience continued for a year. They are obtained as follows:

$$\frac{\text{Number of Admissions During the Week} \times 52}{\text{Average Strength for the Week}} \times 1000$$

In order to make this report promptly available the figures contained herein are presented, in general, as reported. The symbol # indicates that current data are not available. In such cases, the most recent data are utilized.

Shore stations with an average strength of 500 or more are listed individually; stations under 500 strength are grouped.

*INCLUDE: CATARRHAL FEVER, ACUTE; INFLUENZA;
PNEUMONIA-BRONCHO, LOBAR & ATYPICAL;
TONSILLITIS, ACUTE & PHARYNGITIS, ACUTE

CURRENT TRENDS

Week Ending 24 Mar 1945

The admission rate for All Causes dropped this week. The curve continues to stand slightly above the curve for the corresponding period of 1944. The highest rate (1101) was reported by the 9th District; the lowest rate (433) was reported by the 7th District.

The respiratory disease rate fell this week. The trend was upward in only two districts, the 3rd and 5th. The highest rate (384) was reported by the 9th District; the lowest rate (99) was reported by the 7th District.

The venereal disease rate dropped this week. The rate 40 compares unfavorably with the rate 29 for the corresponding week of 1944. The highest rate (54) was reported for the 5th District; the lowest rate (21) was reported by the Potomac and Severn River Commands.

Influenza and Catarrhal Fever, Acute. The rate for these infections dropped this week. This curve stands below the curve for the corresponding week of 1944. The highest rate (286) was reported by the 3rd District; the lowest rate (63) was reported by the 7th District.

Pneumonia--Broncho and Lobar. After standing at 4 for the past two weeks, the rate rose this week to 5. The curve has reached the level for the corresponding period of 1944. The highest rate (12) was reported by the 3rd District. The 6th District reported no cases.

Pneumonia, Atypical. The rate for this disease continues at 2. The curve stands slightly below the curve for the corresponding period of 1944. The highest rate (4) was reported for the 7th and 8th Districts. The 4th, 6th, and 13th Districts reported no cases.

CURRENT TRENDS CONTD.

Tonsillitis and Pharyngitis, Acute. The rate for these infections dropped this week. Except for the 5th week, the curve for the twelve week period of 1945 stands above the curve for 1944 for the same period. The highest rate (192) was reported by the 9th District; the lowest rate (30) was reported by the 7th District.

Rheumatic Fever, Acute. Again this rate is reported at 2. The curve stands below the curve for the same period of 1944. The highest rate (6) was reported by the 9th and 13th Districts. The 4th and 7th Districts reported no cases.

Scarlet Fever. After a slight rise last week, the rate fell this week. The curve stands well above the curve for the corresponding period of 1944. The highest rate (130) was reported by the 9th District. The 6th District reported no cases.

Cerebrospinal Fever, Meningococcic. The rate for this disease dropped again this week. This rate 0.20 stands slightly below the rate 0.26 for the corresponding period of 1944. Only three districts reported cases.

Malaria. The rate for this disease is reported again at 3. The curve stands as the same level as the curve for the same period of 1944. The highest rate (7) was reported by the 5th and 6th Districts. The 3rd District reported no cases.

Measles. The rate for this disease dropped this week. This rate 11 compares favorably with the rate 14 for the corresponding week of 1944. The highest rate (36) was reported by the 9th District; the lowest rate (0.80) was reported by the 13th District.

*The trends here reported are not to be construed as a final analytical interpretation. This week many naval activities are late in submitting their statistical reports. In such cases the data of the previous week are used in preparing the tables.
